Optics in 2013

ILLUMINATE YOUR RESEARCH

Is your peer-reviewed optics research among the most exciting to emerge over the past 12 months? We want to hear about it! Send a 500-word summary of your work—along with a figure or video highlighting your results—to *Optics & Photonics News* via Prism, OSA's new online submission system. Our panel of judges will select the 30 top summaries to be published in our special December issue highlighting the Year in Optics.

For more information and submission guidelines, visit www.osa-opn.org/home/about/#yearinoptics.
